

# Sentara Princess Anne

Sentara Princess Anne is a 72-acre health campus which continues to grow as a destination for health services along the Princess Anne corridor of Virginia Beach.

Located near the intersection of Princess Anne and Dam Neck Roads, the campus includes four medical office buildings, incorporating the latest in diagnostic and imaging technology to aid physicians.

The campus is home to over 100 physicians and comprehensive medical services, including an advanced imaging center, ambulatory surgery center, breast center, physical therapy center and sleep disorders center.

And now with the opening of Sentara Princess Anne Hospital, in partnership with Bon Secours Virginia, the campus is an even more convenient and comprehensive destination for healthcare services.
