

REFERENCE LAB SERVICES

SENTARA REFERENCE LABORATORY At GREENBRIER HEALTHPLEX

Residents and physicians of Chesapeake now have a convenient, easily accessible Patient Service Center where routine and specialized lab services, including EKGs, can be performed. The new center at Greenbrier HealthPlex is part of Sentara Reference Laboratory, the region's only full-service Reference Laboratory, performing more than four million tests each year.

- Patients of all ages, infants to older adults, are served by highly trained staff, using advanced procedures and the latest equipment.
- Test collection and processing capabilities range from standard and esoteric blood, urine and microbiological analysis to drug screening and anatomic pathology.
- Area physicians are provided with customized prescription pads containing check-off test lists, space to write instruc-

tions, and map with directions for patients.

- Patient comfort is assured with a relaxed setting, expedited procedures and the caring service that is the hallmark of Sentara.
- Laboratory professionals include medical technologists with specialty certification and pathologists with advanced training in a variety of disciplines.
- The facility is accredited by the College of American Pathologists, the Virginia Department of Health and the Joint Commission on the Accreditation of Healthcare Organizations (JCHAO).
- Transfusion Services and Histocompatibility / Immunology are accredited by the American Association of Blood Banks (AABB) and the American Society of Histocompatibility and Immunogenetics (ASHI).
