Sophia Leung, MD, Orthopedic Hand Surgeon
We don’t define an athlete.
You do.
Sentara Sports Medicine Center provides specially-trained physicians and surgeons to take you from injury back to the activity you love.

We treat people of all ages and skill levels, specializing in:
• Knees, shoulders, ankles, hips, hands, necks, backs
• Muscle strength and development
• Sprains and strains, torn tendons and ligaments
• Joint dislocation and fractures
• Concussions

Our team of specialists employ advanced techniques to aid in healing, including splinting and medications, as well as injections using platelet-rich plasma (PRP) therapy and other non-surgical and surgical procedures. Diagnostic X-rays can be done onsite at the Sentara RMH Orthopedic Center.

Learn more at Sentara.com/sportsmedicine or call 540-689-5500.

For Brandy, struggling with her weight for years had started to affect her health.

“My doctor told me I was at risk for a heart attack or diabetes. I knew I had to get my weight under control.” In January 2016, Brandy had gastric sleeve weight loss surgery.

“I’ve lost 120 pounds. My blood work has improved tremendously. I’m living a newer, healthier lifestyle. If someone is considering weight loss surgery . . . this is truly a decision you’ll never regret.”

Learn more about Sentara Weight Loss Surgery and the options available to you.

Watch Brandy’s story and learn more about your weight loss surgery options at SentaraWeightLossSurgery.com.
The benefits of open-heart surgery without the open-heart surgery.

We’re saving and improving lives with a less invasive way to replace heart valves.

There’s a far less invasive alternative to heart valve surgery – and across the country, only highly skilled heart centers with the required expertise and a cardiac hybrid OR have been chosen to offer it. Sentara RMH Medical Center is among them. This new procedure is called transcatheter aortic valve replacement (TAVR). It allows doctors to replace a diseased heart valve with a catheter using only a small incision in the patient’s thigh.

It’s another way our specialized team of cardiologists, cardiothoracic surgeons and cardiac anesthesiologists at the Sentara Heart Valve and Structural Disease Center can improve your quality of life.

To learn more about this and other treatments available, visit sentara.com/heart.
Acid Reflux, You’ve Met Your Match.

LINX is a small, flexible magnetic ring placed around the esophagus above the entrance to the stomach. The ring flexes to allow food to pass into your stomach, but keeps the burning stomach acid from coming back up. LINX is proven to help patients remain free of daily gastroesophageal reflux disease (GERD) medications, significantly reduce heartburn and regurgitation, and improve quality of life. Patients who have the LINX procedure have also experienced reduced gas and bloating.

This procedure is minimally invasive. Most patients go home the same day.

Learn more about the LINX procedure at Sentara.com.
