“On May 3, 2014, while travelling out-of-state, I suffered cardiac arrest. The local hospital said I had four arteries 100% blocked, but that I wasn’t a good candidate for open heart surgery. I came home and met with Dr. Jerome McDonald at Sentara RMH Medical Center. He and the team are a true gift to the Valley. He looked at me and said, ‘I can fix you.’ And he did”.

—Mike Lam, Harrisonburg

Medical School: Mercer University School of Medicine
Internship: University of Tennessee-Chattanooga
Residency: Greenville Hospital System
Fellowship: Eastern Virginia Medical School
Board Certification: General Surgery

Member since 2010
Lung Cancer Screening
CT Scan for Early Detection

The Lung Cancer Screening at Sentara RMH Medical Center is a low-dose CT scan that covers the entire chest and provides a more detailed look than a standard chest X-ray.

Medicare and the U.S. Preventive Services Task Force (USPSTF) recommend low dose CT lung screening for high risk patients as defined below. Those who have symptoms of a lung condition at the time of screening, such as a new cough or shortness of breath, are not eligible.

- Medicare: 55-77 years old with 30-pack year smoking history and is a current smoker or has quit within the last 15 years
- USPTF: 55-80 years old with 30-pack year smoking history and is a current smoker or has quit within the last 15 years

Most insurance plans cover this as part of their screening program. Check with your insurance plan for their eligibility criteria and coverage.

Discuss lung screening with your healthcare provider or call 1-844-EARLY-DX.

If you’ve struggled with weight loss, this outpatient, non-surgical procedure may be your solution.

It’s a 2-part program designed to help you lose weight – and keep it off.

1. A soft balloon is placed in your stomach. A team, including a nutritionist, will work with you to develop a new diet and exercise program.
2. After six months, the balloon is removed. For six more months, you continue to be supported by your team as you adopt your new lifestyle changes.

Learn more about the ORBERA™ balloon procedure and the other weight-loss options provided by the Sentara bariatric surgery program at Sentara.com/WeightLossSurgery.

The intragastric balloon procedure is not covered by insurance.
Is Joint Pain Slowing You Down?

At the Sentara OrthoJoint Center®, we know it happens all the time. Just as you’re hitting your stride, joint pain slows you down.

But joint pain doesn’t have to keep you down. Our expert team provides seamless, coordinated care of your joint replacement surgery. We offer:

- A dedicated patient navigator to guide you through the process
- Pre-surgery classes
- No hospital gowns – wear your own clothes at the hospital!
- Detailed guidebooks for you to keep
- Reunion luncheon to celebrate your recovery

To learn more about the Sentara OrthoJoint Center® program, call our dedicated line at 1-855-2ORTHOJT or visit Sentara.com/orthojointcenter.
There's a new, far less invasive alternative to heart valve surgery – and across the country, only highly skilled heart centers with the required expertise and a cardiac hybrid OR have been chosen to offer it. Sentara Heart at Sentara RMH Medical Center is among them. This new procedure is called transcatheter aortic valve replacement (TAVR). It allows doctors to replace a diseased heart valve with a catheter using only a small incision in the patient’s thigh.

It's another way our specialized team of cardiologists, cardiothoracic surgeons and cardiac anesthesiologists at the Sentara Heart Valve and Structural Disease Center can improve your quality of life.

To learn more about this and other treatments available, visit sentara.com/heart.
